IDE	Visual Studio Code, Eclipse, STS

Experience Summary

♦ **Frugal Scientific Pvt Ltd, Bengaluru** (**March 2020 – July 2022)**
Job Title: Product Engineer
Comprises the process of innovating, designing, developing, testing, and deploying a software product. Followed Agile (scrum) methodology during development and delivery. Learned different coding languages to build and use analytical software specific to a company's projects.

Project 1: Ewire
Domain: Virtual banking
Environment: Java 1.8, Spring boot, hibernate, MySQL, JSP, Tomcat Web Server
- Enabled and migrated core banking system backed Open Loop pre-paid card platform.
- Integrated the Client given APIs with existing code
- Optimized the code and added logger for testing purpose

Project 2: Quik Pharma
Domain: Pharma ordering platform
Environment: React Native, ReactJS
- Coordinated with online order platform for pharma distributors, pharmacies, and patients.
- Investigated and planned the real time scenarios to start a project with new key concept as a team.
- Formulated the flow of project and design which will meet the requirements, balancing the goals and constraints on the solutions.
- Designed and developed key parts of web and app design

Project 3: EasyBin
Domain: Waste Management
Environment: React Native, ReactJS

- Participated in Reverse Logistics and Extended Producer Responsibility (EPR) Reporting Platform for waste management
- Investigated and planned the real time scenarios to start a project with new key concept as a team.
- Formulated the flow of project and design which will meet the requirements, balancing the goals and constraints on the solutions.
- Designed and developed key parts of web and app design

Project 4: saleStrait
Domain: Commission platform
Environment: Java 1.8, Spring boot, hibernate, MySQL, Tomcat Web Server

- Provided restful API support for multi-channel direct sales and marketing commission platform.
- Investigated and planned the real time scenarios to start a project with new key concept as a team.
- Formulated the flow of project and design which will meet the requirements, balancing the goals and constraints on the solutions.
